Lithography (lith'grafi). [ad. mod.L. *lithographia* or F. (and Ger.) *lithographie*: see LITHO- and -GRAPHY.]

†1. A description of stones or rocks. *Obs.*

1708 *Phil. Trans.* XXVI. 161 Having some Years since Publish'd his *Specimen Lithographice Helveticæ*, and perhaps designing a Lithography, his Observations on Figur'd Fossils are not so numerous as we should otherwise have wish'd.

†2. The art of engraving on precious stones.

1730 BAILEY (folio). *Lithography*, the Art of cutting or engraving in Stone; also a Description of Stones.

3. The art or process of making a drawing, design, or writing on a special kind of stone (called 'lithographic stone'), so that impressions in ink can be taken from it.

Lithography was invented in 1796 by Alois Senefelder of Munich (1771-1833). The term (in Ger. form *lithographie*) was used c. 1804-5 by Senefelder's associates at Munich.

1813 H. BANKS *Lithography* 8 Mr. P. H. André introduced the art under the title of Polyautography... I have taken the liberty, however, to change this for Lithography.
1819 tr. Senefelder (*title*) A Complete Course of Lithography. 1832 BABRAGE *Econ. Manuf.* xi. (ed. 3) 78 A few years ago one of the Paris newspapers was reprinted at Brussels as soon as it arrived by means of lithography.
1851 RUSKIN *Stones Ven.* I. Pref. 10 Executed in tinted lithography. 1879 *Print. Trades Jnl.* xxvi. 17 The process of lithography consists essentially in the application of a greasy ink on to a damp stone.

Lithoid (lith'oid), *a.* [ad. Gr. *λίθοειδής*, *f.* *λίθος*-stone: see -OID.] Of the nature or structure of stone.

Geol.* (ed. 2) 108 By the progressive development of crystallites or crystals during the cooling and consolidation of a molten rock a glass loses its vitreous character and becomes lithoid; in other words, undergoes devitrification.

So **Lithoidal** (lith'oidal), *a.*, in the same sense.

1833 LVELL *Princ. Geol.* III. 124 At a greater depth the mass assumes a more lithoidal structure. 1852 TH. ROSS *Humboldt's Trav.* I. ii. 93 Lithoidal lavas.

Lithological (lith'ol-djikal), *a.* [f. LITHOLOGY + -IC + -AL.] Pertaining to lithology; relating to the nature or composition of stones.

1797 *Monthly Mag.* III. 50 A description of the lithological and mineralogical empire. 1833 LVELL *Princ. Geol.* III. 237 To put the student upon his guard against too implicit a reliance on lithological characters as tests of the relative ages of rocks. *Ibid.*, Gloss., *Lithological*, a term expressing the stony structure or character of a mineral mass. We speak of the lithological character of a stratum as distinguished from its zoological character. 1881 RAMSAY in *Nature* No. 618. 420 The various formations, by help of the fossils they contain, have been correlated in time, often in spite of great differences in their lithological characters.

Hence **Lithologically adv.**, in regard to lithology; with respect to the nature of stones.

1845 CAPT. NEWBOLD in *Jnl. Asiatic Soc. Bengal* XIV. 300 Ferruginous and coloured clays that sometimes, lithologically speaking, resemble laterite. 1872 W. S. SYMONDS *Rec. Rocks* iv. 84 The Aran range, with its mountain peaks, resembles the rocks of Cader Idris lithologically.

Little (littl), *a., adv., and sb.* Forms: 1 *lytel*, *littel*, *Northumb.* *lyttill*, (*lytl*, *littl*), 2-3

lutel, *lut(t)l*, *lit(t)l*, 3 *lutil*, *lutell*, *leitell*, 3-5 *lyutel*, *litelle*, -ul, 3-6 *lit(t)el*, *litell*, 4 *luiteil*, *littil*, *lytelle*, -alle, 4-5 *lytul*, 4-6 *lytel*, -il, -yll, *littil*, *littill*, -ell, 4-7 *litle*, 5 *litull*, e, -ille, -yll, *littull*, *lytyle*, -elle, 5-6 *lyt(t)ell*, *lyttyll*, *lyttill*, -yl(le, 6 *lyt(t)lo*, *lyttill*, *lytel*, *lytill*, (*laytell*, *lickell*, 7 *lickle*), 6- *litle*. See also *LEETLE*. [*OE. lytel, lytel*, corresponds to *OS. luttill* (MDu. *lytel*, Du. *luttel*), *OHG. luzzil*, also *luzil*, ? *luzil* (MHG., mod. G. dial. *litzel*); -WGer. **littilo*, f. **lūt* (prob. f. the root of *OE. lutan* to bow down; see *LOUT v.*) represented in *OE. lyt*, *lyt* and the equivalent forms: see *LITE sb.*, and in *OS. luttik*, *OFris. littich*, *OHG. luzzelg* *litle*. A synonymous and phonetically similar (but radically unconnected) adj. *OTeut. *littilo* is found as Goth. *leitils*, ON. *littil* (Sw. *liten*, *lilla*, Da. *liden*, *lille*), and possibly in *OE. lytel*, MDu. *littel*, mod. Flem. *lytjer*; the root **lit-*:-pre-Teut. **leid-* may be cogn. with **loid-* in Gr. *λοιδωπος* abuse, L. *ludus* (-*ludus*) play; as some scholars have compared *Lith. laidan* I let flow, *leidan* I set free.

The long vowel in *OE. lytel* is vouched for by metrical evidence (Sievers in *Beiträge* X. 304) and certain features of the declension (Sarrasin *ibid.* IX. 365), as well as by the early ME. *littell*. On the other hand, the Northumb. *lytel*, and the widespread early ME. *littell*, suggest that the *y* may have been short in some dialects, and perh. generally in the synopated flexional forms. The modern dialects that are marked by a large Scandinavian element in the vocabulary mostly have the vowel long, the pronunciation being (*lit*l) or the like; this seems to point to influence from the ON. *littil*.

A. *adv.* The opposite of *great* or *much*. Compar. LESS, LESSER; superl. LEAST.

These forms, however, are not quite coextensive in application with the positive, so that in certain uses the adj. has no recognized mode of comparison. The difficulty is commonly evaded by resort to a synonym (as *smaller*, *smallest*); some writers have ventured to employ the unrecognized forms *littler*, *littlest*, which are otherwise confined to dialect or imitations of childish or illiterate speech.

I. Opposed to *great*. Often synonymous with *small*.

Its customary antithetic association (in mod. Eng.) is with *great* or *big*, not with *large*; on the other hand, *small* is the customary antithesis of *great* or *large*, but not of *big*. One difference between the two synonyms is that *little* is capable of emotional implications, which *small* is not.

1. Of material objects, portions of space, etc.: Small in size, not large or big. Of persons: Short in stature.

Liver (liv'ar), sb.³ Also 7 leaver, 7-glover. [A back-formation from the name *Liverpool*.] A name arbitrarily given to the bird figured in the arms of the city of Liverpool.

It was intended for the eagle of St. John the Evangelist, the patron saint of the corporation, but owing to the unskilful delineation there have been many guesses as to the identity of the bird represented. In some ornithological books the name is given to the Glossy Ibis.

1. A name popularly applied to reptiles of the genus *Lacerta*, and to other reptiles resembling these in shape and general appearance, having an elongated body, a long tail, four legs, and a scaly or granulated hide. Ordinarily, the name relates to the small animals of the genus *Lacerta* and other genera of the order *Lacertilia*; by extension, animals like the crocodile, the agama, the iguana, or the great fossil saurians, are often spoken of as lizards. In scientific books, the name is commonly used as coextensive with that of the order *Lacertilia*, which includes many animals which, as lacking either limbs or scales, or both, would not be popularly regarded as 'lizards'.

Whether the sense of 'bread' or that of 'loaf' is the earlier is uncertain, as the ulterior etymology is obscure. For many doubtful conjectures see Uhlenbeck *Gotische Etymologie* s.v. hlaifs. Some have suggested connexion with OE. hlifian to rise high, tower, the reference being supposed to be to the 'rising' of leavened bread. Outside Teut. the following synonymous words are certainly in some way connected (most probably adopted from Teut.): OSI. xliba (Russian ХЛѢБЪ), Lith. klėpas, Lettish klaipts, Finnish leipä, Estonian leip. It has been supposed by some that the initial element in G. lebkuchen, lebzelter, gingerbread, is an ablut-vary of this word.]

1. An orthopterous saltatorial insect of the family

Acrididae (characterized by short horns), esp. *Ecdipoda migratoria* (or *Pachytelus migratorius*), the Migratory Locust, well known for its ravages in Asia and Africa, where, migrating in countless numbers, it frequently eats up the vegetation of whole districts. Locusts are in many countries used for food.

In the Hebrew Bible there are nine different names for the insect or for particular species or varieties; in the Eng. Bible they are rendered sometimes '*locust*', sometimes '*beetle*', '*grasshopper*', '*caterpillar*', '*palmerworm*', etc. The precise application of the several names is unknown. *Bald locust*: in Lev. xi. 22 used to render the Heb. *סלסל* *sol-sām*, because the Talmud states that this word meant a locust with a smooth head.

Logarithm (lɒˈɡərɪθm). *Math.* Also 7 *error*. *logorythm*. [ad. mod. L. *logarithmus* -us (Napier, 1614), f. Gr. λόγος word, proportion, ratio + ἀριθμός number.]

Napier does not explain his view of the literal meaning of *logarithmus*. It is commonly taken to mean 'ratio-number', and as such interpreted it is not inappropriate, though its fitness is not obvious without explanation. Perhaps, however, Napier may have used λόγος merely in the sense of 'reckoning', 'calculation' (cf. LOGISTIC).

One of a particular class of arithmetical functions, invented by John Napier of Merchiston (died 1617), and tabulated for use as a means of abridging calculation. The essential property of a system of logarithms is that the sum of the logarithms of any two or more numbers is the logarithm of their product. Hence the use of a table of logarithms enables a computer to substitute addition and subtraction for the more laborious operations of multiplication and division, and likewise multiplication and division for involution and evolution.

The word is now understood to refer only to systems in which the logarithm of any number a^n is x , a being a constant which is called the *base* of the system. The logarithms (of sines) tabulated by Napier himself were not logarithms in this restricted sense, but were functions of what are now called the *Napierian* (also *Neperian*), *hyperbolic*, or *natural logarithms*, the base of which, denoted by the symbol e or ϵ , is 2.71828... This system is still in use for analytical investigations, but for common purposes the system used is that invented by Napier's friend Henry Briggs (died 1630), the base of which is 10; the *Briggsian* or *Briggian logarithms* are also known as *common* or *decimal logarithms*. For *binary*, *Gaussian logarithm*, see the *ads.* *Logistic logarithms* (see quot. 1795); also called *proportional logarithms*.

In mathematical notation 'the logarithm of' is expressed by the abbreviation 'log' prefixed to numeral figures or algebraical symbols. When necessary, the base of the system is indicated by adding an inferior figure: thus 'log₁₀ a ' means 'the logarithm of a to the base 10'.

-**logger** (*lɒdʒər*), the ending of a few words which are virtually adaptations of actual or assumable Gr. words in -*λόγος* (L. -*logos*): see -LOGUE, -LOGY. The oldest of these is *astrologer* (14th c.); it is uncertain whether this was f. L. *astrolog-us* + -ER *l* (in which case it is an unusually early example of a type of derivation afterwards common), or whether it was f. *astrology* + -ER *l* (cf. the similar formation of *astronomer*, *astronomer*). On the analogy of this word, -*logger* was applied in a few instances to form personal designations correlative with words in -*logy*, -*logic*, as in *chronologer*, †*geologer*, †*philologer* (obsolescent), †*theologer* (*horologer* is of different formation). 1. The branch of philosophy that treats of the forms of thinking in general, and more especially of inference and of scientific method. (Prof. J. Cook Wilson.)

The proper scope of this department of study has been and is much controverted, and books on 'logic' differ widely in the range of subjects which they include. The definition formerly most commonly accepted is 'the art of reasoning'; for various modern definitions see the later *quots.* At all times the vulgar notion of 'logic' has been largely that it is a system of rules for convincing or confounding an opponent by argument.

In the Middle Ages logic (or DIALECTIC, *q.v.*) was one of the three sciences composing the 'trivium'; the former of the two divisions of the seven 'liberal arts'.

-logic (lɒdʒɪk), **-logical** (lɒdʒɪkəl), endings originally occurring in adaptations (through F. and L.) of Gr. adjs. in *-λογικός*, derived from adjs. and sbs. in *-λογος, -λογον*, which have derivative nouns of quality or function in *-λογία*, represented in Eng. by *-LOGY*. As the meaning of an adj. in *-logic(al)* may with substantial correctness be rendered by 'pertaining to *-logy*', such adjs. are commonly apprehended as derivatives of the related sbs. (as if f. *-logy* + *-ic*). In general, the existence of a sb. in *-logy* now implies the potential existence of a correlative adj. in *-logical* (the exceptions being confined to a few of the older words, such as *apology*, which have corresponding adjs. of different formation). For the difference in meaning between adjs. in *-logic* and the (now much more frequent) adjs. in *-logical*, see *-ICAL*, and cf. the note under **GEOLOGIC** 1.

Hellenistic and Neo-Platonist) philosophers in certain metaphysical and theological applications developed from one or both of its ordinary senses 'reason' and 'word'; also adopted in three passages of the Johannine writings of the N.T. (where the English versions render it by

'Word') as a designation of Jesus Christ; hence employed by Christian theologians, esp. those who were versed in Greek philosophy, as a title of the Second Person of the Trinity. By mod. writers the Gr. word is used untranslated in historical expositions of ancient philosophical speculation, and in discussions of the doctrine of the Trinity in its philosophical aspects.

-logue (lŏg), the form assumed by the Gr. -λογος, -λογία in adapted words (most of them through Fr.), as *analogue*, *catalogue*, *dialogue*. The words with this ending which are designations of persons (in most instances repr. actual or assumed Gr. compounds of -λόγος 'speaker, discourses', and related to parallel formations in -logy) are now little used, derivatives in -loger, -logist, or -logian being commonly preferred. b. Used as *sb.*: A heavy fish.

help ye. 'No, you won't', Harvey snapped, as he hung on to the line. 'It's my first fish'.

-logy (lɒdʒi), earlier written *-logie*, an ending occurring originally in words adapted from Gr. words in *-λογία* (the earliest examples, e.g. *theology*, having come through F. *-logie*, med.L. *-logia*). These Gr. words for the most part are parasynthetic derivatives; in some instances the terminal element is λόγος word, discourse (e.g. in *τετραλογία* tetralogy, *τριλογία* trilogy); more commonly it is the root λογ- (ablaut-variant of λεγ-, λέγειν to speak: cf. LOGOS). In the latter case, the sbs. in *-λογία* usually denote the character, action, or department of knowledge proper to the person who is described by an adj. or sb. in *-λόγος*, meaning either '(one) who speaks (in a certain way)', or '(one) who treats of (a certain subject)'. Hence the derivatives in *-λογία* are of two classes, (1) those which have the sense of 'saying or speaking', examples of which are the words anglicized as *battology*, *brachylogy*, *cacology*, *dittology*, *eulogy*, *palilogy*, *tautology*; and (2) names of sciences or departments of study. As the words of the last-mentioned class have always a sb. for their first element, and o is the combining vowel of all declensions of Gr. sbs., the ending of these compounds is in actual use always *-λογία*, becoming *-ology* in Eng. The names of sciences with this ending are very numerous: some represent words already formed in Gr., as *theology*, *astrology*; many represent formations which might legitimately have existed in Gr., as *geology*, *zoology*, *psychology*; others are of hybrid composition, as *sociology*, *terminology*, *insectology*. The modern formations in *-logy* follow the analogy of Gr. formations in having o as the combining vowel; exceptions are *petrology* (an incorrect form which some writers prefer to *petrology* because it shows the derivation from πέτρα rock, not from πέτρος stone) and *mineralogy* (F. *minéralogie*, which may be viewed as a contraction for **minéralologie*). The suffix *-ology* is freely used in the formation of humorous nonce-wds., some of which are illustrated below. All the modern formations in *-logy* may be said to imply correlative formations in *-logical* and *-logist*; in the case of some of the older words, the related personal designation ends in *-loger* or *-logian*. (Cf. *-logue*.) Hence *Logy nonce-wd.* = *ology*.

The sense which the word has in Eng. has not been found in Du. earlier than the 16th c., but may be much older in slang use; the word was prob. introduced into England by foreign 'loiters' or vagrants. The same root is found in MDu. *lutsen* to wag about.

For examples of the OFr. and med. L. terms see J. M. Manly in *Harvard Studies Philol. & Lit.* I. (1892) 88 ff. The main difficulty is that these terms appear, whenever their sense can be determined, to mean the octave of Pentecost, or Trinity Sunday. Prof. Manly, however, points out that there is evidence that 'Pentecost' was sometimes used for the season beginning at Easter and closed by Whitsunday, so that the transference of the name 'close of Pentecost' from Trinity Sunday to Whitsunday, though lacking direct evidence, is not improbable. The use may have been merely local English; the *Ayenbite* and *Shoreham* both belong to Kent.]

13. a. *Phonetics and Prosody.* Applied to a vowel (in mod. use also to a consonant) when its utterance has the greater of the two measures of duration that are recognized in the ordinary classification of speech-sounds. Also, in *Prosody*, of a syllable: Belonging to that one of the two classes which is supposed to be distinguished from the other by occupying a longer time in utterance. (Opposed to *short*.) Long mark: the mark (-) placed over a vowel letter to indicate long quantity.

In Greek and Latin metre, a syllable is reckoned long (1) when it contains a long vowel or a diphthong, and (2) when its vowel is followed by more than one consonant (to the latter rule there are certain exceptions). A short syllable is conventionally supposed to occupy one time-unit (*morae*) in utterance, and a long syllable two. The distinction between the two classes of syllables, with criteria nearly identical with those of Gr. and Latin, is recognized in the prosody of many other peoples; in Skr. the equivalents of 'long' and 'short' are used of vowels only, syllables being classed as 'heavy' and 'light'.

Various inaccurate uses of the terms *long* and *short* were formerly almost universal in Eng., and are still common. (1) The vowel of a 'long' syllable, if 'naturally' short, was said to be 'long by position'. (2) By a confusion between the principles of quantitative and those of accentual verse, the stressed syllables, on the periodical recurrence of which the rhythm of English verse depends, were said to be 'long', and the unstressed syllables 'short'. (3) In ordinary language ('the long a, e, i, o, or u' denotes that sound of the letter which is used as its alphabetical name, while 'the short a, e, i, o, or u' denotes the sound which the letter most commonly has in a stressed short syllable (in the notation used in this Dictionary, respectively æ, e, i, ɒ, ʊ). c 1000 ÆLFRIC *Grant. vi.* (Z) 37 On langne o ȝeendiaȝ greccise naman feminini generis. 1412-20 LYCOE *Chron. He is also said to be 'long' when he holds a good deal. *Mod. Newspaper.* The spinners had gone heavily long, and consequently did not need to buy except in very small quantities. Long, obs. form of LUNG; aphectic f. ALONG.

-long [lɒŋ], †-longs suffix, forming advs. The earliest instance is *endlong*, from ON. *endlang-r* adj., 'extending from end to end', 'the whole length of'. The word is properly a compound of LONG a.; but in Eng. it was principally used as adv., and developed the sense 'end-wise', 'end foremost', so that it became parallel in meaning to words like *sidelong*, *headlong*, *backlong*. The ending -long thus came to be regarded as a variant of -LING suffix 2. Hence, on the one hand, the occasional 14th c. form *endelyng* for *endlong*, and, on the other hand, the substitution of *headlong's*, *sidelong's*, *flatlong's* for the earlier *headling's*, *sideling's*, *flatling's*.

† b. Prefixed to indefinite pronoun or adv., or relative conj., forming indefinite relatives = *whoever, whatever, however*, etc. Also, in later use, emphasizing the correspondence of relative and antecedent, as in *look as* = 'just as'. *Obs.*

The absence of examples between the 12th and the 16th c. is remarkable: the idiom was prob. preserved in some non-literary dialect.

In later use (which is merely colloquial) the sense is commonly 'to bestir oneself briskly', 'to lose no time' (the vb. being app. taken in a sense belonging to branch III, and *sharp* regarded as a complementary adj.).

9. intr. To have the appearance of being; to seem to the sight. (This sense when used of persons often retains some mixture of the notion of 1 c.) Const. a predicative sb. or adj., or a predicative adv. *as well, ill* = 'in good, bad health'.

b. with adv. of manner († or adv. phrase): To have a certain look or appearance.

This use is often indiscriminately condemned, but is justly censurable only where *look* is virtually equivalent to *seem*, so that it requires a predicative complement and not a qualification of manner. (So, e.g., in quot. 1645.) Owing, how-ever, to the prejudice excited by the inaccurate use, *look* now rarely occurs with advs. of manner other than *well, ill, badly*. In some early instances the apparent adv. may possibly be an adj. in -ly.

These compounds, however, seem to be merely modern Germanisms; the relevant sense of the verb, *Sw. lōpa*, *Da. løbe*, being app. foreign to early Scandinavian, and due to the influence of the corresponding *G. laufen* (I.G. *lōfen*). Further, the mod. *Sc.* form of *ON. hlopp* would be regularly *lopp*, pronounced (lūp), whereas the word *loop* is in *Sc.* pronounced (lōp); the spelling *loope* in *G.* Douglas is ambiguous, but prob. represents (lōp); cf. *droope* = droop. The Irish and Gael. *lūb*, formerly suggested by Prof. Skeat, presents at least a noteworthy resemblance of sound and meaning to the Eng. word.]

Gr. *Λυσιμάχιον*, f. the personal name *Λυσίμαχος* *lysimaachus*, an application of the adj. *λυσιμαχος* 'loosing' (i.e. ending) strife, f. *λυσι-*, combining stem of *λύνειν* to loose + *μαχη* strife.

The form **Λυσιμαχία* (found only in Pliny's Latin translation) would be correct Gr. for 'the action of loosing strife'. The misinterpretation of the word is ancient; Pliny, though stating that the plant was discovered by one *lysimaachus*, also says that oxen that are made to eat it are rendered more willing to draw together. Ancient writers mention two kinds of *lysimaquia*, the purple and the yellow, the descriptions of which agree with the two plants referred to in 1 below. Modern botanists have appropriated *lysimaquia* as a generic name to the 'yellow loosestrife'.

1. The name for two common herbaceous plants resembling each other closely in growth (upright and tall) and habitat (margins of ditches and streams).

Wülck.), repr. a prehistoric form **hlaitward*, f. **hlait* (OE. *hlif*) bread, *loap* + **ward* (OE. *weard*) keeper (see *WARD* sb.). In its primary sense the word (which is absent from the other Teut. langs.) denotes the head of a household in his relation to the servants and dependents who 'eat his bread' (cf. OE. *hlāf-ēta*, lit. 'bread-eater', a servant); but it had already acquired a wider application before the literary period of OE. The development of sense has been largely influenced by the adoption of the word as the customary rendering of *L. dominus*. The late ON. *lǫrd* is adopted from ME.

With regard to the etymological sense, cf. mod. G. *brotherr*, lit. 'bread-lord', an employer of labour. In the mod. Scandinavian langs. 'meat-mother' (Sw. *matmoder*, Da. *madmoder*, Icel. *matmóðir*) is the designation applied by servants to their mistress.

For the phonology of the OE. word see Bülbring *Ac. Elementarbuch* §§ 367, 411, 562. In the 14th c. the word became monosyllabic through the dropping of the intervocalic *v* and the crasis of the vowels thus brought into contact.]

The rules now accepted for its use are as follows. In other than strictly ceremonial use it may be substituted for 'Marquis', 'Earl', or 'Viscount' (whether denoting the rank of a peer, or applied 'by courtesy' to the eldest son of a peer of higher rank); the word *of*, when it occurs in the more formal designation, being dropped. Thus 'Lord Hartington', 'Lord Derby', 'Lord Manvers', 'Lord Palmerston', may be used instead of 'The Marquis of Hartington', 'The Earl of Derby', 'Earl Manvers', 'Viscount Palmerston'. A baron (whether a peer, or a peer's eldest son known by the title of his father's barony) is always called by his title of peerage (either a surname or a territorial designation) preceded by 'Lord', as 'Lord Tennyson'; if the Christian name is mentioned for distinction, it comes first, as 'Alfred, Lord Tennyson'. The territorial titles given by courtesy to judges in Scotland are treated like those of barons, as 'Lord Monboddo'. The younger sons of dukes and marquises have the courtesy title of 'Lord' followed by the Christian name and surname, as 'Lord John Russell'. These rules were, for the most part, already formulated in the 16th c., but were for a long time seldom accurately observed except by experts in heraldry.

In early use the prefixed title had most commonly the form *my Lord* (see 15) or *the Lord*. The latter survives in certain formal uses, and in the superscription of letters.

In the 17-18th c. *Lord's day* (without the article) was somewhat widely used (not exclusively among Puritans) as an ordinary name for the day. This use seems to be partially retained by some Nonconformists (expressions like 'next Lord's day' appearing occasionally in announcements of services). Otherwise, the *Lord's day* is the only form now current, and it is commonly employed only when the intention is to refer expressly to the sacred character of the day.

OE. *hlōtan*, OS. *hlōtan*, OHG. *liogan* (MHG. *liezen*), ON. *hlōta*, to cast lots, obtain by lot. The precise formal equivalent of the Eng. word is not found elsewhere exc. perh. in OFris. *hlot* (? neut.), MDu. *lot* neut. (also masc.), Du. *lot* neut.; but synonymous sbns. from the same root appear in all the Teut. langs. From the wk. grade are, besides those already mentioned, OHG. (*hluz* masc., ON. *hlut-r*, *hlut-r* masc. (MSw. *luter*, *loter*, Sw. *lott*, Da. *lot*), *hlute* wk. masc.; from the form **hlaut-* are OE. *hlūt*, *hlēt*, *hlēt* masc. (MHG. *lōz* masc. and neut., mod.G. *loos*, *los* neut.); cf. also ON. *hlaut* fem., blood of sacrifice. The Teut. word was adopted into the Rom. langs.: F. *lot* (whence *lotir* to divide, in OF. to cast lots), It. *lotto* game of chance, Sp., Pg. *lote* lot, Sp. *loto* 'lot' put up to auction. Probably some of the uses of the Eng. word are due to the influence of F. *lot*.

The primary meaning of the Teut. root **hlut-* is uncertain. Schrader has suggested that it may have been formed by secondary ablaut from the wk.-grade **hlut-* (repr. pre-Teut. *hlut-*: see HOLT) in the sb. **hluto-m*, the primary sense of which would then be the piece of wood used in casting lots. But this conjecture is very doubtful, and not free from difficulties.]

1. An object (app. usually a piece of wood) used in a widely diffused ancient method of deciding disputes, dividing plunder or property, selecting persons for an office or duty, etc., by an appeal to chance or the divine agency supposed to be concerned in the results of chance. The 'lots', each bearing the special mark of one of the competitors, were placed in a receptacle (in Homeric Greece a helmet); according to Greek procedure the vessel was shaken, the winning lot being that which fell out first; in Scandinavia (see Vigf. s.v. *hlutr*) the winning lot was drawn out by an uninterested party. In Eng. (exc. in rare modern instances, chiefly translations from ancient langs.) the word in this sense

occurs only in the phr. to cast, draw (also lay, put, send, throw, warp) lots (or lot); followed by on or upon, over, between, for (the object or objects concerned); also by inf. or indirect interrog. clause.

In genuine OE. idiom the vb. governing *hlot* was *weorpan* to throw (see WARP v.); cf. G. *das los werfen*, L. *sortes conicere*, Gr. *κλήρον βάλλειν*. In ME. *werpe* was superseded by the synonymous *cast* and *throw*. The OE. use of *sendan* is a Latinism, after *mittere* of the Vulgate. The only forms of the phrase that survive are to cast lots (arch.) and to draw lots (cf. F. *tirer au sort*), which is interpreted as synonymous with to draw cuts (CUT sb. 1).
